

reaMini standard

Our REATEC reaMini standard temperature indicator points are based on a high-quality self-adhesive paper carrier, on which a single temperature measuring point is applied.

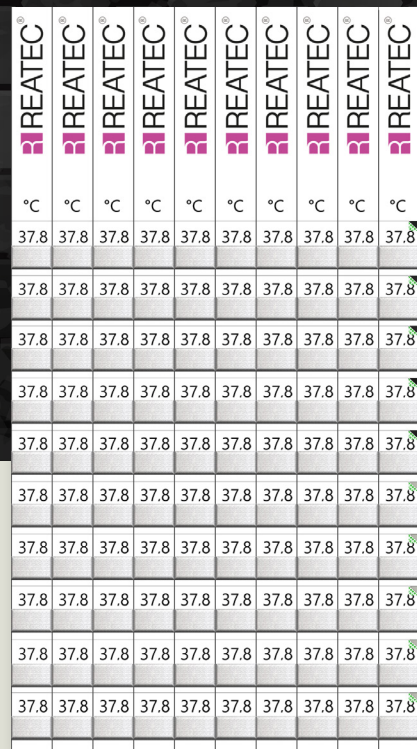

This indicator is characterized by low price and is a more cost-efficient variation of our reaMini professional indicators.

Due to their small size, the indicators can be placed on even the smallest components. To achieve the fastest and most accurate response time, the measuring points are not covered.

Our temperature measuring points are supplied in booklets of 100 individual indicator points each. One booklet contains a pack of 100 pieces. They can be easily attached to the object required to be measured.

Thanks to the small size, they are suitable for uneven round objects and small areas. On the indicator there is a single, uncovered measuring point. As soon as the specified temperature is exceeded, the temperature measuring point will change color within 1 to 2 seconds.

The color change is irreversible; once the temperature is exceeded, the temperature measuring points do not change back to the original color, even if the temperature drops again. Critical temperature fluctuations will be indicated even after a long time period e.g., during storage and transportation.

¹ temperatures 37,8°C - 43,3°C store in a refrigerator

- self-adhesive temperature measuring points
- small-sized shape for use on smallest components
- paper carrier
- wide range of temperatures
- permanent color change from gray to black when the specified indicator temperatures are exceeded
- process monitoring and cost-effective long-term monitoring on surfaces of any kind
